SUBJECT ID	SUBJECT NAME	DESCRIPTION	STREAM ID	COURSE ID	ACTION
1	Classical	Classical mechanics is a physical theory describing the motion of macroscopic objects, from projectiles to parts of machinery, and astronomical objects, such as spacecraft, planets, stars and galaxies	science	Bsc physics	
3	Electrodynamic	Electromagnetism is a branch of Physics, that deals with the electromagnetic force that occurs between electrically charged particles.	Commerce	BSc Maths	
4	Magnetism	Magnetism is the force exerted by magnets when they attract or repel each other. Magnetism is caused by the motion of electric charges.	Diploma	BSC chemistry	
5	Solid Geometry	Objects that occupy space are called solid shapes. Their surfaces are called faces. Faces meet at edges and edges meet at vertices.	javaaaaa	BCOM	
6	Polymer chemistry	What Is Polymer Chemistry? Polymer chemists study large, complex molecules (polymers) that are built up from many smaller (sometimes repeating) units.	science	Bsc physics	
7	Financial Systems	A financial system consists of institutional units and markets that interact, typically in a complex manner, for the purpose of mobilizing funds for investment, and providing facilities, including payment systems, for the financing of commercial acti	science	Bsc physics	
8	Python	Python is an interpreted, object-oriented, high-level programming language with dynamic semantics. ... Python's simple, easy to learn syntax emphasizes readability and therefore reduces the cost of program maintenance.	Commerce	BFA	
9	Marketing Management	Marketing managers are responsible for developing, implementing and executing strategic marketing plans for an entire organization (or lines of business and brands within an organization) in order to attract potential customers and retain existing on	Arts	BEM	
10	Painting	the art or process of applying paints to a surface such as canvas, to make a picture or other artistic composition. a composition or picture made in this way. the act of applying paint to a surface with a brush.	Diploma	BFD	
12	History of fashion	The modern industry, based around firms or fashion houses run by individual designers, started in the 19th century with Charles Frederick Worth who, beginning in 1858, was the first designer to have his label sewn into the garments he created	Arts	Computer Engineering	
13	Structural Analysis	Structural analysis is the determination of the effects of loads on physical structures and their components. Structures subject to this type of analysis include all that must withstand loads, such as buildings, bridges, aircraft and ships.	Commerce	Bsc physics	
14	Cloud Computing	Simply put, cloud computing is the delivery of computing services—including servers, storage, databases, networking, software, analytics, and intelligence—over the Internet (“the cloud”) to offer faster innovation, flexible resources, and economies o	Diploma	BCOM	
16	Electro-magnetism	Electromagnetism is a branch of physics involving the study of the electromagnetic force, a type of physical interaction that occurs between electrically charged particles	science	BFD
